down earlier, multiply
your shutter speed by
two and set it to that
number, then change
your ISO to 400. It

should look the same
as the first image you
took earlier. If you
were to increase the
ISO to 800, you would
need to again double
your last shutter speed
from 1/250 to 1/500.

exposure: effects of
adjusting aperture,
shutter speed and ISO.

If you read part one of
our manual exposure
guide, you'll know
there's more to manual
exposure than just
making sure it's not
too bright or too dark.

Aperture, shutter
speed and ISO all have
practical and creative
effects on your photos.

Aperture Shutter Speeds And **exposure: effects of adjusting aperture**

••
If your shutter speed is long enough, which might be the case if you are shooting at night, you are all set. If you need to slow down your shutter speed, you need to make offsetting changes to your ISO and Aperture. First put the ISO as low as possible. On most cameras that is ISO 100.
