Synthesis, Sp Analysis[Matrix Approach]- Network Analysis & Synthesis

- There are many synthesis equations that map $X[k]$ uniquely to $x[n]$
- Therefore, the STFT is very redundant if we move the analysis window one sample at a time $n=1,2,3,\dots$
- For this reason, the STFT is generally computed by decimating over time, that is, at integer multiples $n=0, 2, 3, \dots$
