Projections Comics And The History

"Jared Gardner's Projections: Comics and the History of Twenty-First-Century Storytelling contains some of the most fascinating and theoretically advanced writing about comics to date, and it marks a watershed moment not only in comics study but also in postclassical narratology, American Studies, and related areas of research . . . Gardner's fascinating account to a transnational vantage point from which we can trace the history and envision the future of comics."

Projections argues that the seemingly sudden visibility of comics is no accident. Beginning with the parallel development of narrative comics at the turn of the 20th century, comics have long been a form that invites- indeed requires- readers to help shape the stories being told.

Projections: Comics and the History of Twenty-First ...

The first, Jared Gardner's Projections: Comics and the History of Twenty-First-Century Storytelling, explores how the medium of comics has cemented its position as an innovative and challenging narrative form that engenders new methods of active, participatory reading, while the second, Bart Beaty's Comics versus Art, takes a more pointed view of the relative neglect of comics as a form of visual art, explaining how that exclusion has come to define much of its history.
