Throughout the tonal spectrum, this tube is very balanced in the mids with a full bass response. The clean tones are often described as "glassy" and "shimmering." When pushed into overdrive, the tone is smooth and very linear. 6L6 driven amps make great platforms for pedals due to their clean headroom and even response.

instruments such as bass guitar, electric piano, and Hammond organ. Guitarists playing electric blues originally obtained an overdriven sound by turning up their vacuum tube-powered guitar amplifiers to high volumes, which caused the signal to ...

### **Distortion (music) - Wikipedia**

The back line of the Rolling Stones consisted of a wall of SVTs both for guitar and bass, all powered by 6550 tubes. The 6550 was also common to all Marshall amps sold in the U.S. in the 80s. Lots of JCM800 and JMP's had the tubes.

### **Tubes and Tone: Understanding Different Amplifier Tubes ...**

Tube sound (or valve sound) is the characteristic sound associated with a vacuum tube amplifier (valve amplifier in British English), a vacuum tube-based audio amplifier. At first, the concept of tube sound did not exist, because practically all electronic amplification of audio signals was done with vacuum tubes and other comparable methods were not known or used.

### **Tube sound - Wikipedia**

Ampeg used six 6550s in their SVT ("Super Vacuum Tube") amp in the early 1970s, creating an extremely clean, round, and warm sound that would become a classic for bass players. The 6550 is not commonly used in guitar amps, but in the 1970s the US distributor for Marshall sold many JMP guitar amps with 6550s instead of EL34s.
